# ZoneTeq® Lighting Fixture Cables

A quick, safety, fixture cable system, meets high-rise office building fire code.
Suitable for using in office buildings, shopping malls, chain stores, warehouse, ..etc.

1. Galvanized steel conduit to protect all cable wires.
2. Factory assembled, minimize human error at job site installation.
3. Fast connection, no job site cutting, sheathing.
4. Environment-friendly: at time of relocation, 100% re-usable, low re-location cost.
5. Safety: Meet high-rise office building fire code.

Series Connection

1. Three 18 AWG wires extended from femal connector. Lift the connector inside the fixture for connection.

2. install the 3 wires to connect the fixture connector. Lock the female connector at the other fixture cable to extend to next fixture.

3. restore the fixture connector into inside of the fixture. If required, apply a hoop to hold onto fixture
